Environmental Policy Pol 03

Innogistic **Vision and Values** show our commitment to **Valuing Society** and taking our environmental responsibility seriously. We recognise our responsibility to the planet, fellow inhabitants and future generations above and beyond regulatory requirements.

Our aim is to reduce our environmental impact year on year by:

- monitoring our impact
- constantly seeking ways to reduce carbon usage
- offsetting the carbon we do use
- pro-actively reducing, reusing, recycling

In order to contribute to sustainable prosperity in the future we offset our carbon usage through the **Carbon Neutral Company**. This action is in recognition of the inevitability that our business will generate carbon emissions, but acts to demonstrate our commitment to proactively reduce and manage these emissions in order to retain this accreditation in the future.

In the three year period from October 2007 to September 2010 we will offset almost 500 tonnes of CO₂ to support renewable energy projects throughout the world.

Signed: 

Dave Roberts, Managing Director

Date: 3 April 2009
