FastSUITE DSI™

Applications

Back Office Systems

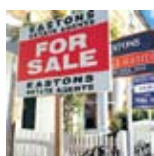

FastPLANNING, Development Control

FastPLANNING is a comprehensive Development Control Management System designed for the efficient processing and handling of planning applications.

FastCONTROL, Building Control

FastCONTROL is a comprehensive Building Control Management System, designed for the efficient processing and handling of building control applications.

FastCHARGES, Land Charges

FastCHARGES is a comprehensive Land Charges Management System, designed for the efficient processing of land charge searches.

FastGROUNDS, Grounds Maintenance

FastGROUNDS is a Comprehensive Grounds Maintenance Management System designed for the efficient processing and handling of grounds maintenance tasks

FastGCIS, Contaminated Land Management

FastGCIS is a Ground Contamination Information System designed for the efficient maintenance of data related to contaminated land and the processes required to manage that land.

Address Management Applications

FastMATCH, Address Matching

FastMATCH is a comprehensive Address Matching system, designed for cross matching disparate address databases produced by legacy information management systems

FastGAZETTEER, BS7666 Gazetteer Maintenance

FastGAZETTEER is a comprehensive BS7666 gazetteer maintenance application designed for the creation and management of Local Land and Property Gazetteers.

e-Government & Internet Solutions

FastWEB, On-line access to planning applications

The FastWEB application integrates FastPLANNING with your own website, providing search facilities for citizens to query planning applications in their local area.

FastPORTAL, Links to the Planning Portal and Submit-a-Plan

The FastPORTAL application provides a link between the Planning Portal and the FastPLANNING application. Planning applications submitted on-line at the Planning Portal are electronically transferred to the FastPLANNING application for subsequent processing by the planning department.
