World leading solar energy supplier upgrades to Version 9 of Concept 3000

Thermomax the worldwide leader of Solar energy systems and winners of 10 major international awards including the Queens Award for Export Achievement upgraded to the latest version of Concept 3000 software. This new version includes many new developments such as advanced export and intrastat collection and reporting facilities, credit checking has been added to Hot Links for more company wide use and there are a range of new add-ons including office links and contact database.

Thermomax have also taken Concept's SmartPrint and SmartPDF modules which will give them complete control of the design of their documentation and production of PDF documents.

Our company has also designed and developed

advanced software which synchronizes shared data between Thermomax's two state-of-the-art sites in Wales and Northern Ireland.
